Hey Warren, can we add this to the tracked folders: https://t.me/INJtrading

INJ Army Trading
Unofficial chat for Injective Protocol trading, prices and more. Legit Group: t.me/joininjective Disclaimer (because every YouTube influencer tells me I'm supposed to write this apparently): Not investment or financial advice
Is there any way for me to add these by myself?

I know there's a config file somewhere

I will add it . Currently the server needs to restart when a new cog is added. I need to make a modification to the program to enable dynamic reconfiguration but it's not a trivial change

Okay sounds good. I think Nasir wants ASAP, so is it possible to add it now?

Great thanks. Also, do you have time tomorrow to hop on a call? I want to call about what best practices are for file storage and data loss for the Discord scraper that we talked about a while ago
